DETAILED ACTION

Response to Amendment

1. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 6 recites the limitation "dynamic prompt table file" in lines 8 and 12 respectively. The amendments made create insufficient antecedent basis for this limitation in these claims. Claims 2-5 and 7-10 are rejected due to their dependence on the rejected independent claims.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2134

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yun Lip US 2002/0147913 in view of Renaud US 6,021,491

As per claims 1, and 6 Yun Lip teaches a pinpad terminal comprising a pin pad, memory and display, (wireless phone) [0043]. Yun Lip teaches a numeric keypad used for inputting non-PIN data when an appropriate prompt has been displayed, ([0048], Fig 4, 7, 8, 9). Yun Lip fails to teach authentication.

Renaud teaches authentication of a file using an RSA algorithm and signature file, (Col 3 line 59 to Col 4 line 10).

It would have been obvious to one of ordinary skill in the art to use the method of authenticating software of Renaud with the mobile phone or wireless device of Yun Lip to enhance security (Renaud Col 3 lines 50-56) and to prevent initiating any procedures with rogue files that would compromise the user.

As per claims 2, 4,5, 7, 9 and 10 Renaud teaches use of the RSA algorithm, using private and public keys, to create and verify digital signatures for files, (Col 3 lines 32-Col 4 line 10).

Claims 3, and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yun Lip US 2002/0147913 in view of Renaud US 6,021,491 in view of Yee US 5,781,723.

The previous Yun Lip-Renaud combination teaches authentication but does not teach smart cards. Yee teaches a smartcard that performs multiple cryptographic services, (Col 6 lines 11-25).

Art Unit: 2134

It would have been obvious to one of ordinary skill in the art to modify the Yun Lip-Renaud combination with the smart card of Yee because the smart card enhances the security of the system by virtue of its cryptographic functions, and allows portability.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
